---

## CORPORATE PROFILE

# MOBILE PRESENTS A NEW OPPORTUNITY...

# WHAT WE DON'T DO !!!

Mobile Advantage Company is registered with PTA and is a member of the Global Mobile Marketing Association. All our practices and services are in accordance with the LAW.

With our experience, our customers get the best results.

**Ensuring Safety against Spamming, Marketing & Unsolicited Calls and SMS**

## Public Notice

In accordance with the 'Protection from Spam, Unsolicited, Fraudulent and Obnoxious Communication Regulations 2009' the transmission of harmful, fraudulent, misleading, **illegal or unsolicited messages in bulk to any person without the express permission of the recipient, or** causing any electronic system to show any such message or is being involved in falsified online user account registration or falsified domain name registration for commercial purpose (i.e. spamming) is unauthorized.

PTA has taken strict notice of generation of spamming from individual mobile subscriptions and short codes causing nuisance to the telecom subscribers at large.

PTA hereby intimates all individual users of telecom services that are involved in such activity to refrain from such practices that involve generation of spamming. In case of non-compliance of the same, PTA reserves the right to **initiate legal proceedings in accordance with the Pakistan Telecommunication (Reorganization) Act 1996.**

Telecom consumers in receipt of any unsolicited and/or telemarketing call or SMS from any telephone subscription may inform about the sender and recipient number along with SMS content by messaging to a dedicated common short code **9000** for necessary action at Mobile Operator's end. (Applied tariff: 10 paisas inclusive of taxes per SMS).

PTA is fully committed towards safeguarding the interests of the telecom consumers in the country and appreciates cooperation extended by the telecom consumers towards its efforts to curb the menace of spamming.

Respond with  
YES to subscribe

YES

# Short-Code Integration

Short-Code is the best way to interact with your consumer

# WHAT IS A SHORT-CODE?

An SMS short code is a 4 or 5 digit phone number that is used by businesses to opt-in consumers to their SMS programs

The gathered contacts are sent text message coupons, offers, promotions, etc.

A consumer interacts with an SMS short code by composing a new text message on their mobile device, and addressing it to the businesses 4 digit SMS short code.

For example, 8786 is a short-code – Easy to remember and is a legal way of using SMS for advertising needs.

Usually an SMS short code is advertised to consumers in-store, online, or through traditional advertising channels such as television, radio or even print

When a customer wants to opt-in to an SMS campaign, in addition to the SMS short code, they'll also need to know the SMS keyword, e.g. BURGER, WIN, or a COUPON NUMBER

The image displays two examples of SMS short code advertising. The top example is a billboard for a burger restaurant. The billboard text reads: "TEXT 'BURGER' TO 83733 TO GET COUPON". To the right of the billboard is a promotional graphic for a contest to meet a rockstar. It features a man with a guitar and a smartphone displaying the text "Just send SMS 'ROCKSTAR' to 8786". The contest rules listed are: "CONTEST: PHOTO TAGGING, COMMENT WRITING, FRIENDS REFERRAL, POLL QUESTIONS". The bottom example is a Bisconni Chocolate Chip Cookies promotion. It shows a bag of cookies and several wrapped gifts. The text on the bag says "Bisconni Chocolate Chip Cookies! more chips per bite!". The promotion offers a chance to "WIN an iPhone 6 & Thousands of Prizes Everyday" by finding a code inside the package and texting it to 8786. A small disclaimer at the bottom right of the promotion says "SMS Charges: 50 Pence Only".

# TYPES OF SHORT-CODES

## DEDICATED SHORT-CODE

- Means that it will only be used by one business. For example, NADRA has the dedicated SMS short code number 8300. This means that no other business can operate on NADRA's SMS short code number, because it's dedicated to that specific business. When it comes to SMS marketing, most large brands or organizations go for dedicated short-code.
- A dedicated short-code is expensive and the entire process takes about 4 months for the code to be operational
- Another example is Pink Ribbon who have a dedicated short-code 8099 for Pakistan.

## SHARED SHORT-CODE

- Means that it's used by many different businesses. In the case of a shared short code, each business sharing a short code would be assigned a unique SMS keyword, which helps an SMS provider like MAD to determine which SMS campaign a consumer is trying to opt-in to.
- For example, let's say there's a restaurant, and a clothing store both using the same shared SMS short code. If people wanted to opt-in to receive SMS messages from the restaurant, they'd text the restaurant's SMS keyword "FOOD" to the shared SMS short code, while people that wanted to opt-in to receive SMS messages from the clothing store would text the retailer's SMS keyword "FASHION" to the shared short code.
- A shared short-code is cheaper and requires only a couple of days to be operational

Mobile Advantage Company offers Shared Short-Codes and also helps organizations in acquiring Dedicated Short-Codes

# USES OF SHORT-CODE

**It is never easy for a customer to read a billboard or an advertisement in a limited span of time. For example, on the Road, or on TV. Furthermore, the business never knows about that customer who is interested in their product or services. This is where Short-Code comes in.**

## BUILD COMMUNITY

To gather data of your potential customers and create a club for them to convert them into sales/revenue.

## CONSUMER ENGAGEMENT

Regular engagement with consumers to build a database of loyal customers, future sales, share news/alerts/promotions, etc.

# USES OF SHORT-CODE

A call to action is an instruction to the audience to provoke an immediate response. A customer can be asked to send an SMS, or Visit a Website/Facebook page, make a phone call etc.

# USES OF SHORT-CODE

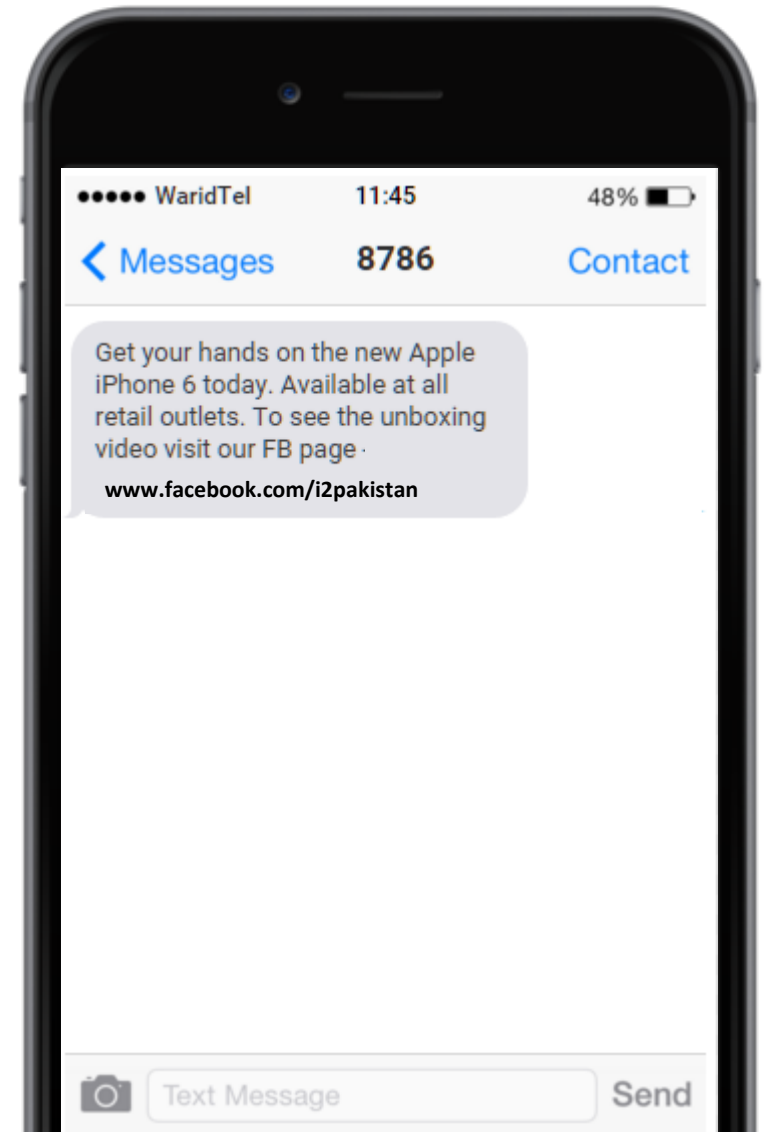

TVC radio print integration by inserting short-code into TVC radio outdoor or print

*Click the image to play video*

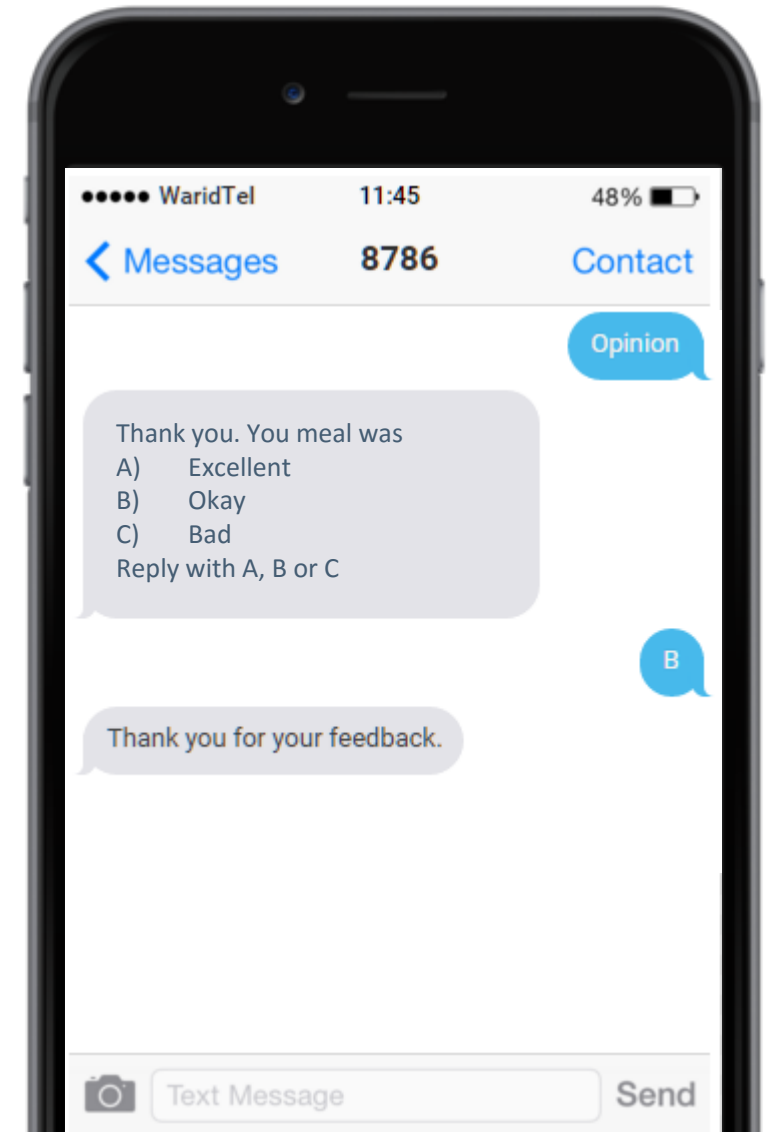

# USES OF SHORT-CODE

Database and Community building  
similar to fb to engage and target  
future upcoming models and  
product / software updates

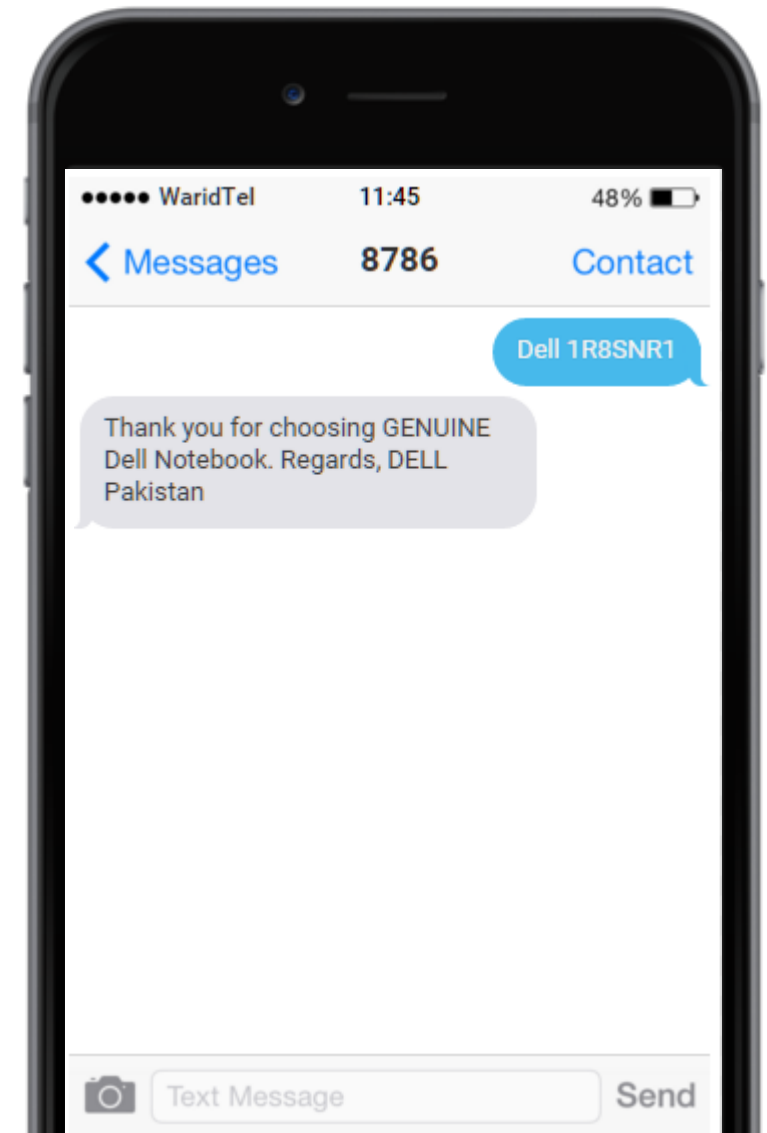

## Competitions and consumer feedback

Grey vs original product verification

## Product Warranty Verification

Promotions – Up-selling & Cross-selling

# Case Studies

What we have done so far

# CASE STUDY

## PAKISTAN TOBACCO COMPANY – Data Collection

### Objective

Pakistan Tobacco Company has engaged the Brand Ambassadors to collect the smokers data. Brand Ambassador used the paper files to record data and subsequently data entry team teams engaged to transfer information from paper to electronic data. This is where MAd stepped in to take up the challenge to speed up the process and authenticate the brand ambassador activities in the market.

### Strategy

MAD team designed SMS based data collection and On Spot verification mechanism backed up with auto reporting structure.

### Result

MAd incorporated SMS based Data Collection Solution, paper files eliminated. Data Entry activity eliminated at the back-end so is the expense. Unique Authentication Code generated and sent via SMS to customer mobile number generated by MAd solution that authenticates customer interaction in the market.

# CASE STUDY

## DELL PAKISTAN – Product Authentication

### Objective

Excess of grey machines imports, Fake warranties under Dell Brand name and brand image at stake were the factors that prompted Dell to have robust authentication system in place.

### Strategy

MAD has designed sms based notebook authentication solution. All the consumer has to do to text a certain keyword with Service tag number printed on machine to dedicated short code (8786). The short code in return trigger a machine status via SMS on buyer's cell number.

### Result

Dell Pakistan can now track the buyers remotely. It has enabled Dell to have the consumer's detail at almost no effort. It has won the trust of buyers. Consumer and Dell got rid of Grey importer and fake warranties providers. Dell has witnessed a considerable growth in sales after the introduction of authentication solution.

# CASE STUDY

## NESTLE – Product Promotion

### Objective

Nestle Nescafe team wanted to create awareness regarding their new product Nescafe Cold Coffee. Nescafe team also had an ambition to reach the young and affluent audience across the country. Furthermore, they wanted to have utmost interaction with them. The quest for Nescafe team to have such an ideal solution that is interactive and viral in line with awareness oriented was fulfilled when MAd stepped in and took the challenge.

### Strategy

MAd team designed SMS based incentivized solution to not only fulfil their quest but rather to exceed their expectations with an augmented solution for data collection and two way consumer engagement to support social media and press ads.

### Result

Huge Buzz was seen in the targeted group spreading in different peers that has made it viral campaign. The young and affluent segment started recommending the product to their friends and it was a massive WORD of MOUTH campaign. This campaign doubled the product consumption couple with 100% auto profiled data of more than 45,000 consumers. Due to success of the campaign, it was extended by another one month.

# CASE STUDY

## BISCONNI – Instant Gratification

### Objective

Bisconni wanted to create awareness & hype for its Chocolate Chip Cookie

### Strategy

MAd helped to design a campaign by offering incentive (Rs 30 topup) to customers who purchased ticky packs for 3 months. Bisconni further enhanced the campaign by giving away 70 iPhones to shortlisted winners. Campaign was promoted through a dedicated TVC and across Facebook.

### Result

Six hundred thousand unique codes were created by MAd, hosted and shared via encrypted email to only one dedicated person working for Bisconni. The unique codes were printed by the Bisconni team and included instructions on how to claim the mobile topup via sms to 8786. These printed codes were then inserted into a percentage of the packs and distributed randomly into various markets across Pakistan. The campaign was promoted on media and when purchased the customer was informed either to “try again” or in the event of winning to text the unique code to 8786 in return for Rs30 topup which was instantaneously credited to their balance. Winners were also informed that they had a chance to win a iPhone.

# Bisconni

# CASE STUDY

## TAMMER BANK – Profiling

### Objective

Tameer bank wanted to reach senior citizens from SEC A and B to promote a saving product.

### Strategy

The Mobile Advantage Company was engaged to work with selected MNO's across five major cities and identify the target audience who were sent a masked SMS from Tameer Bank informing them of the special offer. Print ads were also published in leading newspapers to create awareness with a short code call to action.

### Result

Within seconds of launch the audience started to respond which resulted in hundreds of calls and thousands of sms responses across all cities and operators. Results were better than expected and Tameer decided to extend the service for another month.

# CASE STUDY

## QUIZNOS – Customer Loyalty

### Objective

Quiznos Sub opened up a new outlet and engaged MAD team to devise a strategy to keep bringing their valued customers back to the outlet again and again.

*Click the image to play video*

### Strategy

MAD team designed an incentivised campaign by integration their short-code with their POS, where people dining in will send their check number to the short-code and will get a freebie.

### Result

MAD received more than 4000 messages during a single month, with more than 60% people visting again. During the period of the campaign the footfall in the outlet increased significantly. The data was then further used for regular engagement by Quiznos.

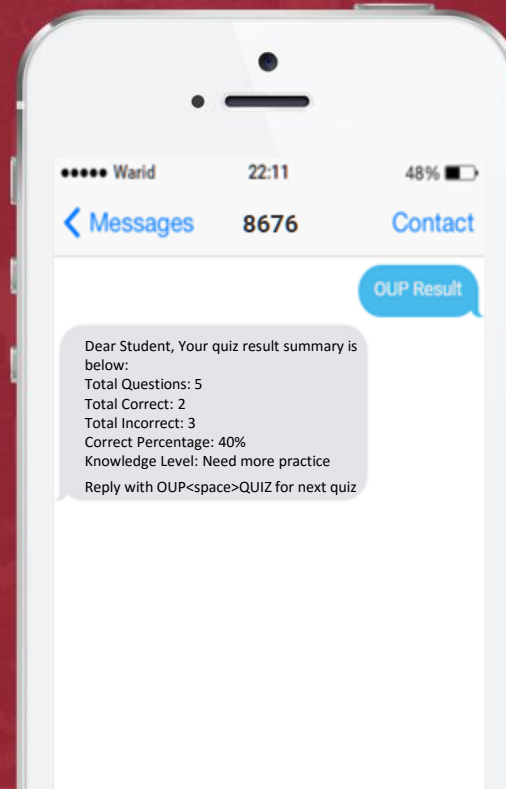

# CASE STUDY

## OXFORD UNIVERSITY PRESS – Education & Quiz

### Objective

Oxford University Press wanted to help their students practice for their exams based on the past papers.

### Strategy

Mobile Advantage Team, took the challenge to create an application using which the students, based on their Class Level, Subject can practice for their examination using SMS with future growth for Mobile Application.

### Result

The outcome was one of a kind application, especially in Pakistan, which is interactive, easy to use and MCQ based. Students can setup their profiles, give exams for different subjects, see their track record. Also, the application was linked with EasyPaisa as the service is based on subscription.

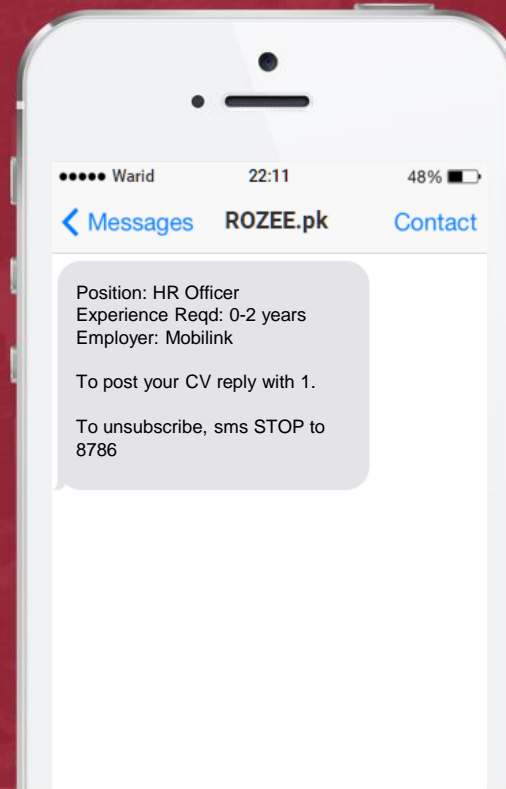

# CASE STUDY

## ROZEE.PK – Timely Alerts

### Objective

Rozee.pk wanted to send job alerts to job seekers on their cell phones so that they do not miss their opportunities while staying offline.

### Strategy

MAd proposed a solution that not only enabled the job seekers to get alerts of their related field but also facilitated them to post their CVs without internet connection by simply replying to the SMS.

### Result

It is first of its kind service in pakistan. It has made people loudly say WOW! It was such a success that in just 1 month around half a million job seekers subscribed to the SMS alerts. It has not just facilitated the job seekers, the employers got massive responses against their job posts.

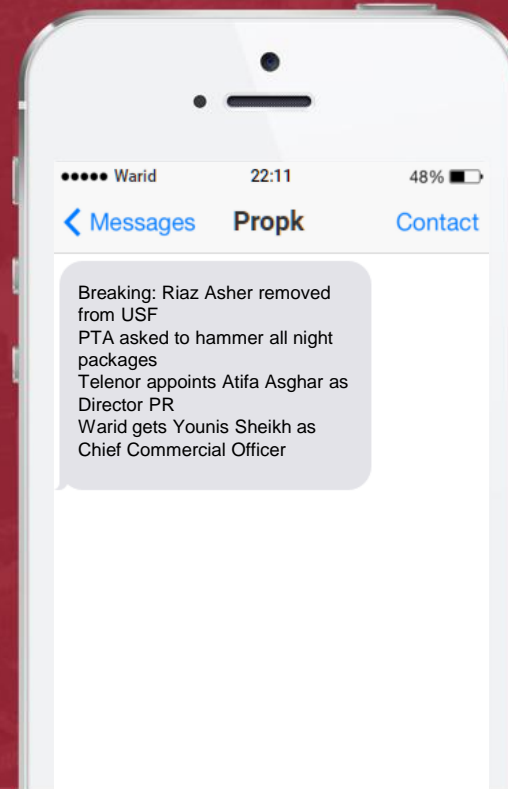

# CASE STUDY

## PROPAKISTANI – Social Media Integration

### Objective

ProPakistan.pk wanted to get their readers informed about special happenings and news regarding the telecom sector.

### Strategy

MAD creative team designed a Graphical User Interface for ProPakistan.pk management using which they can send the important telecom news and related articles to their subscribers cell phones.

### Result

It has made the readers of the Tech Blog feel privileged as they are getting the first hand information regarding the field of their interest without connecting to the PC. It has resulted in generation of excessive word of mouth and therefore the blog traffic has increased with URL integration.

propakistani

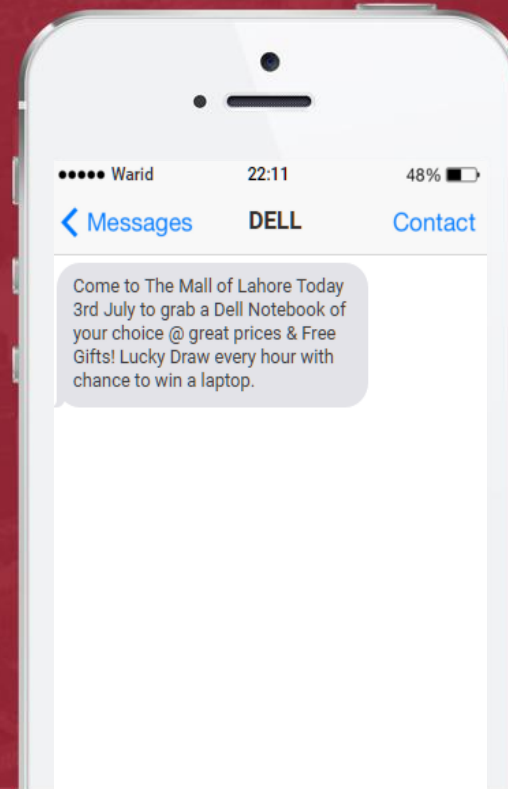

# CASE STUDY

## DELL PAKISTAN – Customer Drive to Location

### Objective

Dell wanted to increase the footfall to its three road shows in Karachi and Lahore to showcase their latest notebooks

### Strategy

The Mobile Advantage Company was engaged to work with selected MNO's within the two cities and identify the target audience comprising of tech savy , computer literate people from corporate and business backgrounds. MAd profiled the target audience and sent DELL masked sms informing people of the event venue times and special offers.

### Result

Despite security issues the events were a huge success drawing crowds from their homes and offices to witness and participate in the activities. Well over 100 new notebooks were sold from a stall on the first day. According to the mall owners average footfall increased by 5 times leading to parking problems due to the campaign.

# Other Services

More Offerings to our Valued Customers

# MASKED BROADCAST

**These are targeted and profiled SMS campaigns sent to active mobile subscribers in collaboration with the Mobile Network Operators. Mobile Advantage, based on the customer's or products target audience creates a profile and designs a campaign.**

**The profile is based on various elements, such as Gender, SEC, Likes/Dislikes, Age, Location, Handset Model/Type, etc.**

**The campaign is then developed keeping in mind, the schedule, target audience and content to gain the maximum output.**

# URL & SOCIAL MEDIA INTEGRATION

**With increase in Smartphone penetration in the Handset Industry, usage of Social Media and Internet has also increased.**

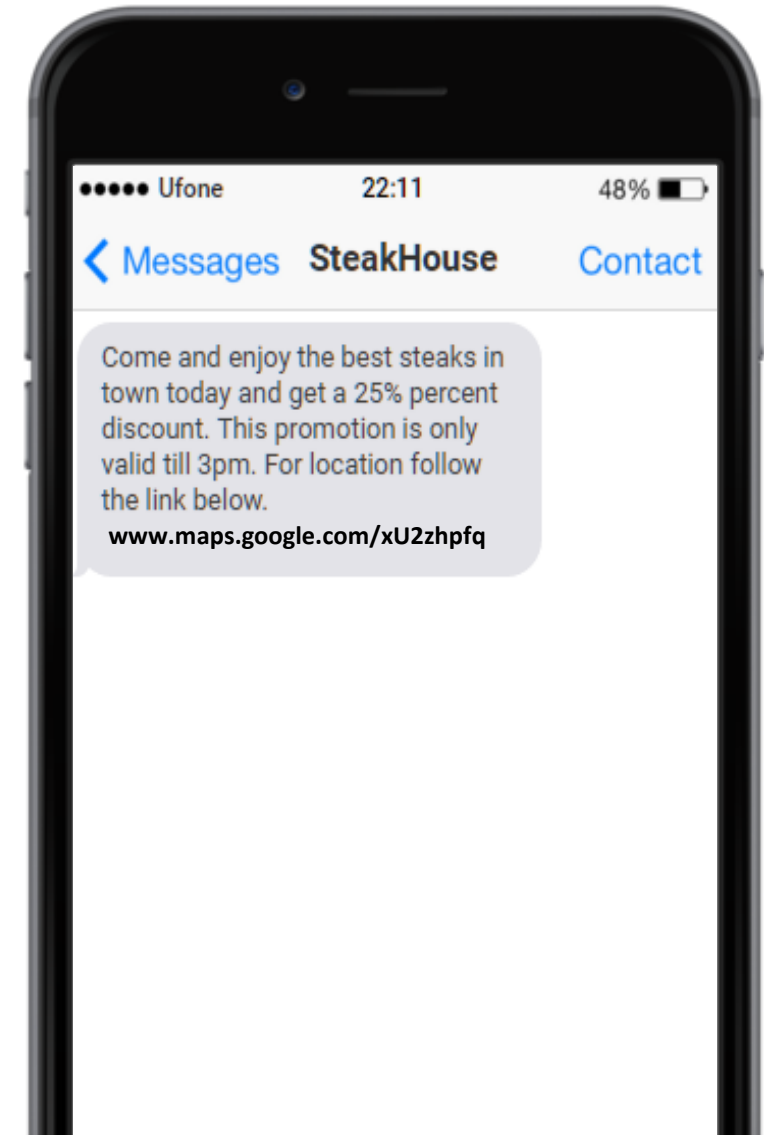

**Consumers like to stay connected on the go and Brands want to reach their customer in read-time.**

# LOCATION BASED ADVERTISEMENT

**Location-based advertising (LBA) is a new form of advertising that integrates mobile advertising with location-based services. The technology is used to pinpoint consumers location and provide location-specific advertisements on their mobile devices.**

**When a consumer enters in the range of a particular cell-site or region, he/she gets the message on their cell phone. The messages are also time-bound, for example, a restaurant offers a promotion during lunch time. When the consumer enters or is present in the defined geographic area, they will receive that promotion.**

# QR & BAR CODES

**QR code (abbreviated from Quick Response Code) is the trademark for a type of matrix barcode (or two-dimensional barcode) that contains information about the item to which it is attached. Barcodes & QR Codes can be easily scanned by a Smartphone to display any information.**

**It can be more information for a product, a link to a URL or a Video, Contact Card, etc. Sky is the limit.**

**Scan the QR Code below  
from your Smartphone to  
visit our Facebook Page**

# AGUMENTED REALITY

**Augment Reality lets you and your customers visualize your 3D models in Augmented Reality, integrated in real time in their actual size and environment. Augment is the perfect Augmented Reality app to boost your sales and bring your print to life. For example**

- **AR can enhance product previews such as allowing a customer to view what's inside a product's packaging without opening it.**
- **Customer can place a furniture in their house before purchasing to see it how it looks or clothes on themselves.**
- **Augmented reality applications can complement a standard curriculum. Text, graphics, video and audio can be superimposed into a student's real time environment.**
- **Auto manufacturers can guide their customers about features of the cars in interactive way.**
- **And much more**

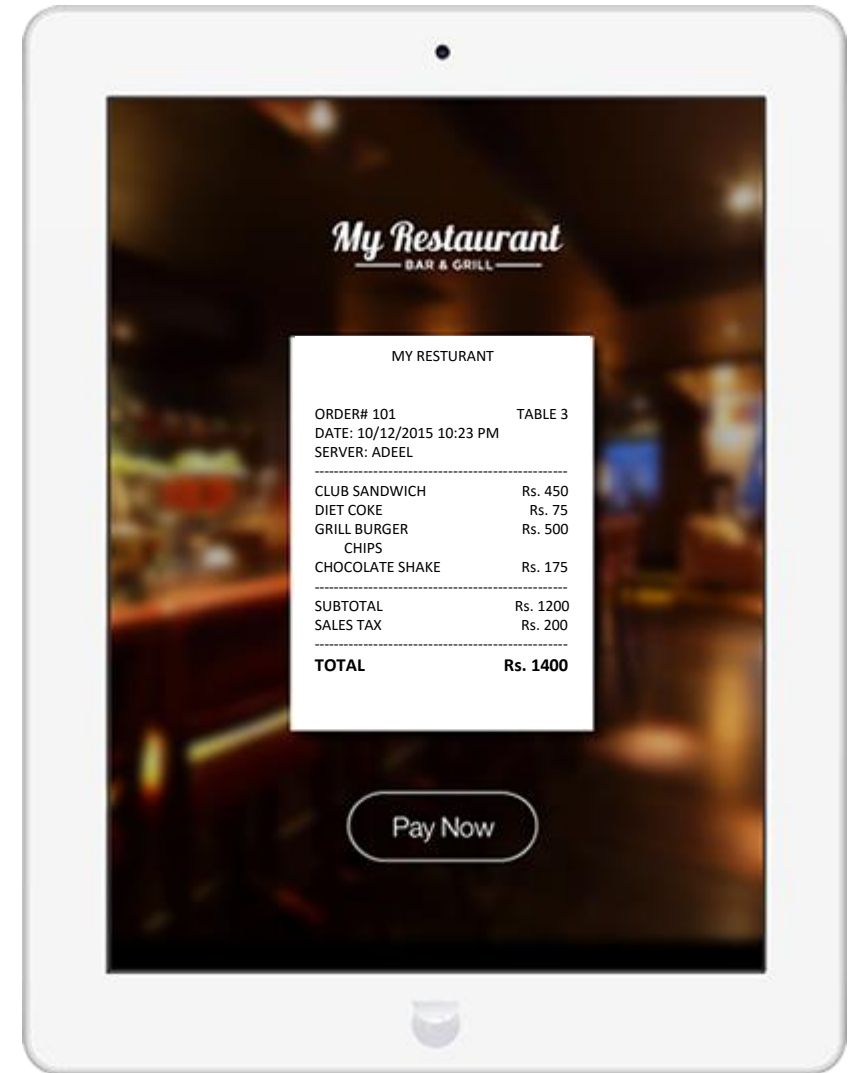

# POS INTEGRATION

**We integrate your POS to create mobile applications, and integrate with SMS to deliver or take information from your customers in real-time.**

**For example, in restaurants integrating with the POS to take orders, especially in case of home delivery. Or a mobile app to take orders so that the waiters don't have to wait.**

**Mobile Financial Services can also be integrated such as EasyPaisha, MobileCash, etc.**
